

# Pre-Application Site Visit Report Project 6538555, 411 1ST AVE S

**Assessment Completed: 7/28/2016** 

**Project Description:** Replace waterproofing and paving of existing deck, create new steps and railings and an

overhead trellis

**Primary Applicant: Robert Leykam** 

This report lists a preliminary assessment of project requirements based on your pre-application site visit (PASV). The PASV is completed by site inspectors from the Seattle Department of Construction and Inspections (SDCI).

## **Next Steps**

- 1. Review the requirements in this report and contact the staff members listed below with questions.
- 2. Schedule an appointment for permit application intake with SDCI. Please bring a copy of this report to your intake appointment.

## **Questions About This Report**

If you have questions about the information in this report, contact: Roger E Moore, (206) 733-9039, Roger.Moore@seattle.gov

# **Other Resources**

- General questions about the permit process: Contact the SDCI Applicant Services Center (ASC) at 206-684-8850.
- User-friendly guides to city permitting processes: <u>SDCI</u> and <u>SDOT</u>.
- Detailed zoning information.
- Visit our <u>permit type pages</u> for step-by-step instructions and forms for preparing your application and plans for review.

# **Pre-Application Site Visit (PASV) Requirements**

PASV report requirements may be subject to additions, changes, or modifications by the department. The purpose of the report is to alert the applicant that there may be unusual or complex site conditions that trigger requirements from the department regarding this project. **The applicant is responsible for providing all required documents at the intake appointment.** If you have questions about this report or the PASV process, please contact the SDCI Site Development Team at (206) 684-8860.

**Note:** Any project application associated with the development site can utilize the results from this PASV if the application is accepted by SDCI within 24 months of the above inspection date. After 24 months, the applicant must apply for another PASV. No extensions will be granted.

The site plan did not include the following existing or proposed elements:

1) Existing site contours @ 2'-0 intervals.

# **ECA Mapping Unit and Type**

This project site appears to include the following ECAs and/or buffers: Liquefaction

#### **Earth Disturbance**

If excavation has the potential to encroach on adjacent property in order to facilitate construction activity, please provide documentation of consent from the adjacent property owner. Show area of proposed encroachment on the submitted drawings and detailed cross-sections.

If temporary cuts greater than 1h:1v will be required in order to facilitate construction activity, please provide a geotechnical engineer's verification that soil conditions allow cuts to stand unsupported. Include detailed cross sections.

## **Potential Impacts to Seattle Parks Property**

No parks property in vicinity

#### **Tree Protection**

Trees greater than 6 inches in diameter as measured 4.5 ft above ground are present on the site but not shown on the site plan. Show the dripline of

- 1) all trees on the site,
- 2) adjacent trees that encroach on the site that are greater than 6 inches in diameter as measured 4.5 ft above ground, and
- 3) all trees located in the adjacent ROW.

Include common and scientific names for all trees shown. For more information, see <u>Director's Rule 16-2008</u> and <u>Tip 242</u>.

# **Construction Stormwater Control**

All projects with earth disturbance, regardless of size, require temporary and permanent stormwater control in accordance with the Construction Stormwater Control (CSC) Technical Requirements Manual (<u>DR 21-2015</u>, Volume 2).

# **Show the following on the Construction Stormwater Control and Soil Amendment Standard Plan:**

Cover bare soil with compost blankets, straw, mulch, matting, or other approved equal to control construction stormwater runoff.

Cover stockpiles and bare slopes with compost blankets, tarps, matting or other approved equal to control construction stormwater runoff.

A First Ground Disturbance inspection is required before any ground disturbance related to this permit, including demolition, tree cutting, clearing, grubbing, and grading. After your permit is issued, schedule an inspection by calling (206) 684-8900 or online at <a href="http://web1.seattle.gov/DPD/InspectionRequest/default.aspx">http://web1.seattle.gov/DPD/InspectionRequest/default.aspx</a>.

#### **Inspectors Notes**

Some or all of the "Standard Submittal Requirements for Projects in an ECA" may be modified or omitted if a "Small Project Waiver" is applied for and granted.

# **Small Project Waivers (See CAM 327B)**

Small project waivers may be applicable for new accessory structures or additions to buildings on lots in existence on or before October 31, 1992 (see SMC25.09.055). Rockeries and retaining walls do not qualify for small project waivers. Applicability of small project waiver must be evaluated and approved at the time of intake.

Cumulative development area is less than or equal to the following:

Potential slide due to geological conditions, flood prone areas, potential liquefaction, landfill/landfill buffers: Development area less than 750 square feet

In all cases, show construction safety fencing separating the ECA and/or its buffer from the development area.

# Standard Submittal Requirements for Projects in an ECA

The site is mapped as liquefaction prone. A geotechnical report is required to address liquefaction potential and, if needed, mitigation (see <u>SMC 25.09.100</u>).
